

EACOP is committed to meeting International Environment and Social standards which include:

International Finance Corporation (IFC) Performance Standards (PSs)

| | | | | |
|---|--|---|------------|--|
| 1 Risk Management  | 2 Labor  | 3 Resource Efficiency  | PS1 | Assessment and Management of Environmental and Social Risks and Impacts |
| | | | PS2 | Labour and Working Conditions |
| 4 Community  | IFC International Finance Corporation <small>WORLD BANK GROUP</small> | 5 Land Resettlement  | PS3 | Resource Efficiency and Pollution Prevention |
| | | | PS4 | Community Health, Safety and Security |
| 6 Biodiversity  | 7 Indigenous People  | 8 Cultural Heritage  | PS5 | Land Acquisition and Involuntary Resettlement |
| | | | PS6 | Biodiversity Conservation and Sustainable Management of Living Natural Resources |
| | | | PS7 | Indigenous Peoples |
| | | | PS8 | Cultural Heritage |

World Bank Group Environmental, Health & Safety (EHS) Guidelines

Organisation for Economic Co-operation and Development (OECD) Common Approaches

The Equator Principles IV (EP4)

The UN Voluntary Principles on Security and Human Rights (VPSHR)

The UN Guiding Principles on Business and Human Rights

International E&S Conventions Ratified into Law in Uganda and Tanzania

Host Countries (Uganda and Tanzania) Laws and Permits

Compliance with these standards for both EACOP and its main associated facilities (the Upstream Projects) is a requirement for EACOP itself, its Shareholders and external Lending institutions.

Independent Third Party Scrutiny

Since 2021, EACOP lenders have retained independent consultants to carry out Environmental and Social Due Diligence (ESDD) of the project and its associated facilities. The Lenders' Environmental and Social Consultants (LESC) assess and report on EACOP compliance with lender environmental and social standards (listed above). The ESDD is undertaken through a combination of document review, site visits and interviews with EACOP and stakeholders, plus identification of environmental and social risks and impacts that the project could generate during the construction and operation phases.

An initial ESDD report with Environmental and Social Action Plan (ESAP), three progress reports and a final ESDD report have been completed by the LESC between 2021-2024. The final ESDD report, with updated ESAP, is available on the EACOP website. The LESC has concluded that EACOP and the associated facilities meet lenders' E&S requirements and have addressed all items required to be completed before financial close.

Going forward the LESC will undertake monitoring visits twice each year to assess project compliance against the E&S requirements and effective implementation of the E&S management throughout the construction phase. EACOP will also issue quarterly environment and social self-monitoring reports summarising compliance with E&S requirements, an annual report will be published externally.

Lenders Environment and Social Consultants (LESC)

The lenders have retained WSP (formerly Golder Associates Ltd) to act as the Lenders' Environmental and Social Consultants (LESC). The LESC team for EACOP comprises seven (7) internationally experienced specialists covering the technical areas set out in the various lender environmental and social requirements.

The role of the LESC is to independently assess and report to the Lender Group on EACOP's compliance with the applicable environmental and social standards. The LESC work on behalf of the Lender Group and are responsible to that Group. Contractually, the LESC are required to perform the services with the skill, diligence and due care of a reasonable and prudent consultant and to act as an 'independent contractor'

Independent Biodiversity and Livelihoods Advisory Committee (IBLAC)

In addition, there is an Independent Biodiversity and Livelihoods Advisory Committee (IBLAC) that was established in 2013 to provide independent advice to EACOP, TotalEnergies Exploration Production Uganda (TEPU) and CNOOC Uganda Ltd on biodiversity and community livelihoods aspects of the Projects. IBLAC provide advice on how best to conserve and enhance biodiversity, and to improve and enhance community livelihoods within their areas of operation and the wider projects' areas of influence within the affected landscapes before, during, and after the project.

The IBLAC committee currently comprises seven (7) independent international and national specialists with a range of expertise including biodiversity conservation, wetlands, wildlife management, forestry, marine and aquatic biology, community development and livelihoods. Each year, the IBLAC committee undertakes an in-country visit to both Uganda and Tanzania to see progress with activities and engage with stakeholders. An annual report is published summarising their activities and progress with recommendations. *(Annual reports can be found on the EACOP website).*
